

Quick Reference

CoA Naming Conventions

Purpose

Use this quick reference to understand CoA segment naming conventions and to better search for values by their descriptions.

Helpful Hints

1. All words in the CoA descriptions are in upper and lower case except for:
 - Acronyms
 - Tub prefix
 - Org suffix (a local option; in some cases org follows the prefix)
 - INTERTUB and INTRATUB designations
2. Last name is first in segments that use a person's name
3. If shared by more than one tub, the tub prefix is followed by an XT
4. The maximum number of characters in descriptions must account for all prefixes, suffixes, and spaces
